Epoxy Powder Coated Steel Mesh Fencing

358 Galvanized Steel Mesh of Epoxy or Polymer Coating

Inner aperture: 72.2 x 8.7mm

Wire diameter: 4mm

Width: to 2.9m

Tensile of the wire: 600-750N/m²

Welded strength: 60%-80%

Height: up to 4.8m

Fence post: 80 x 60mm, 80 x 80mm or 120 x 60mm.

Polymer Coated Steel Mesh

Advantages:

The aperture is 76.2mm horizontal x 12.7mm vertical and makes 358 security fencing extremely difficult to penetrate using conventional hand tools.

- Mesh panels with wire welded at every intersection
 - Overlapped by a minimum of 75mm at posts to maintain integrity of protection
-

- Unique vandal and tamper-proof panel to post fixing
- Extremely strong
- Can be stepped to accommodate sloping ground
- Can be fixed to walls with cranked posts
- Post tops can be customised to carry barbed/razor wire, Rota-Spike, Alarm-aFence electric fence lines, CCTV cameras etc
- Matching swing and sliding gates available for pedestrian and vehicular access.

- **Features:**

Anti-climb: more small openings, no toe or finger holds.

Anti-cut: robust wire and welded joints make cutting very difficult.

Better visibility: flat, two-dimensional profile, easier to see through than chain link.
