Amperehour Solar Technologies is a smart-energy storage company in Pune founded in 2017 by IIT Bombay alumni and power sector experts. We provide Li-ion-based plug-and-play smart-energy storage solutions Ah-stack for off-grid rural mini-grids, energy distribution networks, solar energy storage systems, and standalone systems. Our Ah-stack is fully-integrated with our smart-AI energy storage management solution ELINA-Edge, which can easily be deployed with any of your existing or new energy storage assets independent of Ah-Stack. Amperehour's Li-ion-based energy storage solution will be helpful to reduce diesel consumption and electricity bills. For more details about our energy storage solutions & the ways how they can be helpful for you, call us at +91 9769369624 or visit our website <https://amperehourenergy.com/>.
