Australian Tanks handles all contracts with the same care, courtesy and commitment to successful outcomes whether the job is right next door or on the other side of the country. This approach has allowed us to effectively distribute our products widely throughout Australia.

We search for the most cost effective transport solutions and approach delivery with an attitude of “no area too hard or timing too tight for us to work towards”. Our business model is focussed on providing clever, innovative, easy and safe to install solutions.

Australian Tanks is dedicated to producing quality, engineered solutions, working with plumbing, civil and construction contractors to provide custom designed solutions. We work closely with Civil, Hydraulic and Consulting Engineers to find the best solutions to their challenges and are regularly specified in engineering designs and plans. Many of our solutions are signed off by engineers as being more efficient and cost effective alternatives to more traditional specified products
