Are you a student searching for career astrology to give you higher education astrology prediction? Or are you a parent/guardian looking for guidance to bring educational success in your child's life? This article will give you an insight into some of the common career astrology predictions that can help achieve success in the educational path.

Education is the basic foundation for overall success in an individual's life. The importance and significance of education cannot be ignored. The right education path provides the basic requirements a person needs to shape life perfectly with a better vision. That's how important education is in our lives.

Since ancient times, **astrological career predictions** have been treated as an effective tool to help students and learners to follow the right educational path based on their horoscopes. Astrological remedies have long been sought to appease the planets and decrease any adverse effects of the afflicted planets in our birth charts or horoscope.

In Vedic astrology, the 2nd, 4th, 5th, and 9th houses of the birth chart are the most significant houses related to education and career. Analysis of these houses based on the specific zodiac signs and planets they contain, the lord of these houses, and the aspects and influence of benefic and malefic planets on these houses provide favourable information about education and career.

Also, the most auspicious and supportive planets for excellent educational prospects are favourably placed Jupiter, Mercury, Sun, Moon and Venus. Furthermore, favourably placed Saturn, Mars, Rahu and Ketu are also helpful in driving educational and career success.

Career astrology especially helps, when despite all the hard work and efforts, we are unable to achieve any suitable results and success. When there are constant barriers and obstacles in education, astrology can be the best source of guidance. Below are a few lists of astrological remedies and tips for having a successful educational path.

- If poor concentration, weak memory, and distraction are causing a problem, put up green curtains in the study area of the room. Doing so will help improve the favourable effects and influence of planet Mercury, which is said to bless us with a good education.
 - While studying, it's best to sit while facing the North, East, or North-East direction.
 - Reciting Saraswati Beej Mantra (Om Shreem Hreem Saraswati-ya Namaha) to invoke Goddess Saraswati's blessings.
 - Keep the study area neat and tidy. Cleanliness gives positive energy and is soothing to the mind.
 - Since the planet Moon influences the mind, it affects education. Make the planet strong and favourable by offering silver and uncooked rice in a well.
 - There should be no heavy furniture in the child's study room as it will disturb the flow of positive energy and thus hinder the success in education.
 - One of the simplest and effective **career astrological remedies** to fight all hindrances to educational success is to recite the Gayatri Mantra daily.
-

The above mentioned are some of the common remedies advised to improve the positive prospects in the educational path. However, it is always advised to follow any remedies only after consulting an expert and reliable astrologer. And to consult the best career astrologers, check Astroyogi.com.
