Cekol or Sodium CMC or Sodium CarboxyMethyl Cellulose or Carmellose Sodium is a water-soluble polymer. It is mainly used in the oral pharmaceutical formulations (Tablets, Syrups, Suspensions), topical pharmaceutical formulations, wound care, and dermatological patches. It is chemically stable, physiologically inert and non - toxic material. Pioma's Sodium CMC has a viscosity ranging from 10 to 8000 cps. The uses of Sodium CMC includes rheology modification, improved mouthfeel, protein protection, moisture control, and control crystal growth.

Application of Sodium CarboxyMethyl Cellulose: Thickener, stabilizer, film former, suspending and gelling agent in liquid and semi-solid dosage forms. High strength tablet binder and matrix former in sustained-release tablet formulations.

**Pioma Chemicals** is the leading manufacturer and supplier of **Sodium CMC** since 1989. Located at 'financial capital of India, Mumbai', Pioma Chemicals is very well established in the global market as a source of specialty chemical.
