Vidalista 20 mg and Medication with a generic name of Tadalafil 20. **Vidalista 20 mg pills** are prescribed to treat erectile dysfunction, or problems with impotence, for males. Additionally, it can be used to enhance the performance of athletes suffering from hypertension in the pulmonary vascular system.

Vidalista 20 is manufactured by Centurion labs.

Tadalafil is one of a class of medicines called PDE5 (phosphodiesterase 5) inhibitors) It reduces the blood vessels that line the male body and improves blood flow during sexual exercise. In addition, it can make the bladder more rounded and prostate.

Tadalafil is available as an oral tablet that is taken prior to the first time that sexual activity is anticipated or at a lower dosage once per day.

HOW TO TAKE VIDALISTA 20 MG?

Take the entire tablet of Vidalista with an ice-cold glass, do not chew or crush. Vidalista 20 is taken prior to or following meals. Only take according to your doctor's instructions.

Ideally, it is best to take **Vidalista** 30 minutes before the time you are planning to get sexual sex. It is best eaten with a full stomach.
