**Cenforce 200mg**, also known as Sildenafil Citrate 200mg, is an effective drug used to treat erectile dysfunction (ED) or erectile dysfunction in men by increasing blood flow to the muscles. It is an FDA approved drug and belongs to PDE5 inhibitors. Contains the active substance sildenafil citrate in a concentration of 200 mg. If the conditions are met, some sites may offer **Cenforce 100** for free. Cenforce 200 interferes with the production of cGMP and releases nitric oxide to relax the smooth muscles around the pelvic organs. Reduces, promotes and regulates the level of tension in the penis, maintains good blood circulation and makes the penis more tense. You can keep the effect for about 4-5 hours.
