Cenforce 25 mg is a medication that contains the active ingredient sildenafil citrate. It is primarily used for the treatment of erectile dysfunction (ED), a condition characterized by the inability to achieve or maintain an erection sufficient for sexual activity. Sildenafil citrate is a phosphodiesterase type 5 (PDE5) inhibitor. It works by increasing blood flow to the penis, facilitating the achievement and maintenance of an erection during sexual stimulation. **Cenforce 25 mg** is a lower dosage option of sildenafil compared to higher strengths available in the market.
