CNC Turret Punching Machine / CNC Punch Press Machine

Closed mechanical cnc turret punching machine by the programming software processing program, by the servo feeding mechanism sent the plate material to the required processing position, by the mechanical power system according to the procedure of punching, automatic completion of the work piece processing.

CNC Turret Punching Machine can complete all the hole shapes currently required on the market, and can perfectly complete the work that normal punching machine can't do. It is a kind of equipment that is preferred by sheet metal work manufacturers. With the increasing demand for plate hole shape in the market, Turret Punching Press is an essential equipment for the future plate punching industry.

PuHua Turret Punching Machine Main configuration:

- 1☐Control system: SIEMENS
- 2☐Servo motor: YASKAWA(from Japan)
- 3☐Servo amplifier: YASKAWA(from Japan)
- 4☐Precision liner roller rail: ABBA(from Taiwan)
- 5☐Electric parts: OMRON

Machinery main details:

Germany Siemens 808D System;

Yaskawa & Siemens Servo Motor;

Domestic Well-known Hydraulic System;

AMADA Standard 80mm Ductile Iron Thick Turret DISC;

International Ball Screw & Linear Guide;

International electrical components;

O type steel plate welding press.

PuHua Turret Punching Machine Notice:

According to your requirements, the most suitable turret punching machine will be designed for your workpieces, please indicate the following details.

1. Please tell us your metal sheet material.
2. The workpiece dimension, including length, width and thickness.
3. The information of your workpiece hole shapes and hole diameter.

Based on this detail information, the detailed technical proposals will be sent to you for reference.
