**Portable handheld printer manufacturer** to share with you: In today's fast-paced world, everything is fast and efficient. For example, if we need to travel a short time when we need something, we want to leave a post-it note for the family. It is very inconvenient to write on the post-it note and then paste it on the door. For technology control, these are too OUT. The new sea bird sticker printer launched by the sea bird brand is also Our domestic brands have done a good job. Their main business covers the fields of intelligent imaging equipment, handheld stabilization gimbals, printing consumable chips, and handheld inkjet printers. The Seabird sports camera launched before has also gained public recognition. The Seabird self-adhesive printer introduced this time has been sought after by the public.

### Product unpacking

As a small and portable Bluetooth sticker printer, the packaging of the **seabird sticker printer** is quite exquisite. The pink and blue color scheme is very good. The front of the box mainly displays the product model and product brand. Marking, etc., the back is mainly related to product parameters and related information, etc., is relatively comprehensive.

After opening the packaging box, you can see the true appearance of the product. The product is still very safe in the packaging box. Of course, the packaging is also in place to ensure the absolute safety of the product during transportation.

### packing list:

Seabird sticker printer, charging cable, instruction manual, label sticker box.

### Second, appearance details

From the appearance of the **portable sticker printer**, the Portable Sticker Printer is very good and very compact. It uses a square design and rounded corners on the four sides to make the overall look more sophisticated and stylish. The matte technology is used, and the feel is very good. The overall size is 103 \* 83 \* 33mm, and the weight is 230g. It is like the weight of an iPhone. Such a small and lightweight design can be easily put in your pocket. Of course, it is more convenient to carry.

The paper outlet of the seabird self-adhesive printer is designed at the top. One side is a manual cutter pusher and the other is a paper exit. It uses a manual cutter. Push the paper cutter and push the head to cut off the sticker, which is very convenient and saves the trouble of tearing paper.

### Seabird Sticker Printer unknown

### Seabird Sticker Printer

The power button and power indicator are designed on the other side. Press and hold the switch to turn on the machine. When there is no printing operation for 10 minutes, the machine will automatically shut down, which saves power.

Built-in 300mAh lithium battery, standby time is about 2 months, and TYPE-C charging interface is used on the power interface, which makes charging more convenient and efficient.

---

The back cover is also a matte process, and a small window is reserved under the back cover to view the remaining amount of label stickers. At the same time, the back cover is detachable, making it easier to load the label sticker box.

The label sticker box is a box-type design, which is a thermal self-adhesive technology, free of carbon ribbon, free of ribbon, and free of ink, which saves money and effort.

When using for the first time, you need to expose the label paper in the front section of the label sticker cassette, then put the label paper into the corresponding card slot, and press it to load it. Finally, you can use your finger to turn the front section of the label tape to the cutting edge and use it.

**Portable handheld printer manufacturer** to share with you: As a smart product, you also need to connect with your mobile phone in use, and you also need to use the "Seabird Sticker Printer" APP, currently This APP supports Apple and Android phones, which can be downloaded from the instruction manual or from the major application stores.

After the download is complete, you need to connect with Bluetooth first. This is very convenient. After the connection is complete, you can enter the APP's homepage. From the homepage, it is relatively simple, and the classification is very clear. It is simple to use and there is no complicated operation.

Seabird Sticker Printer

Seabird Sticker Printer

There are three categories to choose from in the "Seabird Sticker Printer" APP, which are video reproduction, label templates, printing history, etc. At the same time, the APP also provides multiple versions of label templates for use, which meets our daily Needed.

It is very convenient to print because there are a large number of materials available in the APP itself. Of course, you can also choose the content you want to print. The printing step is to select the template, then select the edit content, and then select print. The **seabird sticker printer** will automatically print your selection.

Note: The printed labels are self-adhesive labels, which are waterproof, oil-proof, sun-proof, and tear-resistant, which is very good.

The speed from printing to paper output is very fast, and there is no jamming, and the sound is relatively light, and it can be used after cutting off the paper.

Seabird self-adhesive printers do not require ink, and use thermal printing technology and high-resolution printing. The printed handwriting is very clear, fast-drying, and has no pungent taste. After tearing off, you can paste it everywhere.

The most worth mentioning is that the seabird sticker printer can also express more intentions through the cloud transcoding function, that is, through simple operations, you can convert videos, voices, and pictures into a printable two-dimensional code, turning you If you can't say anything, let Seabird printer pass it to your lover, family and colleagues.

Turn on the scan function on WeChat, and then scan the printed QR code label sticker, and the video, voice, and picture set before can appear.

In our daily life, seabird sticker printers can also print labels in life through APP, such as clothing finishing labels, kitchen storage labels, beauty storage, medicine storage, personal product marking, garbage classification marking, learning labels

---

Marks, file management categories, clothing tags, etc. can be printed and pasted by seabird stickers, saving time and worry.

#### Product summary

In general, the **portable sticker printer** is still very good. First of all, from the appearance, it is very small and very portable. Secondly, from the perspective of function, it is very powerful. It can be operated through APP without ink. Can print a large amount of materials, and the printed label stickers have waterproof function, wherever you want to paste it, and finally, from a practical point of view, the life label printing of seabird stickers is very good, you can print clothing finishing labels , Kitchen storage labels, beauty storage, medicine storage, personal product markings, etc., make home storage more organized and more convenient.
