Dermal fillers treatments in Delhi are skin fillers that are very popular treatments among celebrities. They can be both natural and synthetic.

They plump up the skin from the inside giving you a young and youthful appearance. Dermal fillers have hyaluronic acid which is very essential to keep the skin hydrated.

This is a naturally occurring substance inside our body and dermal fillers help in enhancing it. They can last up to 6 to 12 months. The treatment is preferred widely even though it is not permanent because it is less harmful.
