FILL-PACK water filling machine for sale

Title: Linear pneumatic water filler for 3-10L big water bottles

Key words: water filler, water bottling machine, water bottling system

QUICK DETAILS:

Model: CGF4-4-1

Brand: FILL-PACK

Power: 2.25kw

Voltage: 380V 3PH 50HZ or customized

Driven force type: Electrical-Pneumatic

Automation degree: Automatic

Dimension: 4100*1200*1970mm

Weight: 950kg

Application: water

Packing category: Bottles

Packing material: PET

Condition: New

FILL-PACK water bottling equipment

PROPERTIES:

Capacity: 0-600 BPH (5L)

Applicable bottle size: 0-10L

Applicable cap category: Flat screw cap

Key material: SUS304

Fuction: bottle rinsing-filling-sealing-transferring

Processing liquid: water

Filling precision: +/- 1mm

Origin: ZhangJiaGang, China

After sales service: Engineers available to service overseas

Qualification: CE, ISO9001-2008

The empty bottles will be sent to washer through belt conveyor, 4 bottles per shift, each 4 bottles will be calculated and stopped by sensor-cylinder, and 4 bottles will be clamped by clamps at holding neck positions; The bottles will be reversed for bottle rinsing;

Rinsing time and rinsing water capacity is adjustable;

The washed bottles will be sent to filler by conveyor, Block cylinder block 4 bottles in filler conveyor; push cylinder will push bottles under filler, lift cylinder will take bottles to filler heads, open filling value, filling start. The filling is gravity filling; it is easy to control precision. After this process, the bottles will be returned back to conveyor by reverse repeat.

Advanced design for the FILL-PACK Drinking water filling machine

- 1, East for changing bottles within minutes;
- 2, Flowmeter is the heart of the machine, is with special design, it can do correct filling, no need cleaning;
- 3, Strong point of the machine is the machine can fill liquid and also semi-liquid.
- 4, Easy filling volume change by PLC -touch screen;
- 5, Capacity is selective;
