Email	fleekitsolutions73@gmail.com

Fleek IT Solutions is one of the best software testing companies in India. We provide software testing outsourcing services and independent quality testing services across the globe. Our dedicated QA testers work closely with project stakeholders. We report directly to the clients and ensure that our deliverable meets all quality standards.

As a software testing company, we combine several testing activities including test planning, design, execution, and reporting into one multi-threaded process. It saves everyone's time and money. We can do this because we've studied hard and taken the profession of testing software seriously.
