### who we are

Polygamma Industries Pvt Ltd was established in 2012, to cater to the global demand of EPDM roofing membranes and pond liners. Thanks to the decades of experience of the founders in the rubber industry, rubber technology is in the DNA of Polygamma.

Built on an area of nearly 230,000 square feet, the manufacturing facility of Polygamma located near Khapoli town, around 70 kilometers (around 45 miles) from Mumbai. With state of the art machines and technology, this facility is fully dedicated to manufacturing world-class EPDM roofing/waterproofing membranes, EPDM pond liners, EPDM geomembranes, EPDM strips/bands etc. These products find its application in various areas such as roofs, terraces, basements, waterfalls, industrial waste pits, artificial lakes/ponds, building foundations, and other related areas. We also offer EPDM strips/bands of pre-cut widths which can be used for waterproofing & air sealing building facades.

In 2016, Polygamma was recognized as a StartUp by the Ministry of Commerce & Industry-Government of India. In January 2017, we received a 20 year patent for our manufacturing technology. The Polygamma EPDM products are manufactured in accordance to the globally accepted ASTM and EN product standards. Our products bear the applicable CE and GOST-R certifications.

Polygamma is partly funded by a group of angel investors who are leaders in the business eco-system with strong operational experience in creating new and successful ventures.
