We supply both Galvanized Steel Posts and Enamel Coated Steel Fence Posts, for metal mesh fences support and installation. Steel bar and tubular posts are used as fencing accessories to support Mesh Panels or Razor Barbed Wire Tops. The steel fences and posts are all available in a variety of sizes and shapes.

The posts work mostly with these fence panels:

Chain link fence, welded wire mesh and field fence, euro fence and 358 security fences and barbed wire.

Dongfagn supplies two varieties of post profiles: round or square posts.

Popular System of Security Mesh Wire Fences with Fabrics, Posts and Concertina Wire:

Galvanized wire mesh, gauge 9, diamond openings 2 3/8" (two & three eighth inch), 8' (eight feet high), 96' long (ninety feet). Fence posts, 1 5/8" (one and five eighth thick/diameter) x 21' (twenty one feet long).

Concertina wire rolls. Single coil barbed tape concertina with long blade, 450mm in diameter, fabricated from 0.6mm 0.05mm thick galvanized steel strip, 2.5mm 0.1mm diameter high tensile (220,000 psi) galvanized wire, each coil consists of 33 loops with erected length of 7m – 8m per coil.

The common Forms of Fence Posts available include "U" shape, Y shape, T shape and studded fence posts.

Finishes of Steel Posts include: Hot dipped galv., electro galvanized, black, green, and other color coating of PVC, enamel coating, bitumen coating, etc.
