Manage your library with the simplest Library management software. Glibrary provide library management software for public, private and school libraries to maintain and handle countless books systematically. Glibrary is library management software developed by Gayatri Software Services Pvt Ltd, India. It is designed to manage physical collections of items (books, CD's, videos, reference, etc.) as well as managing E-books and membership records. Glibrary is available web-based as well as Installation based, with a SQL database backend with cataloguing data stored in MARC. The user interface is very configurable and adaptable also we provide customization as per requirement of particular library.
