We're basically been a CA firm in Delhi since 2016 with a team of professionals who can provide all the services which are connected a businesses/companies/NGO's. We can keep on counting the number of services we're offering to our clients as of now, but the service we can proudly say best in is GST Registration. Furthermore, this is the first requirement to sell the products in the online market and it does not matter if a company is selling products in the Indian market or overseas.

GST Registration has many benefits and I'll explain it one by one. The first benefit is, Service providers with a turnover of fewer than 20 lakhs need not pay GST. In the northeastern states, the limit is Rs 10 lakh. This is a huge advantage for small businesses, as they can avoid the time-consuming taxation process and focus more on their business activities.

The secondary benefit of GST is, Earlier, the government had to undertake the complex task of administering several indirect taxes. But the GST Network (GSTN), the backbone of GST, will handle all the processes related to GST operation. It is a fully integrated platform, which will simplify and ensure the conduct of GST activities.
