Hydraulic Thick Plate CNC Punching Machine-**PuHua**

What is Hydraulic Punching Machines?

As the name suggests, **PuHua hydraulic punching machine** uses oil as the working medium, uses the pressure energy of the oil and controls the hydraulic actuator to control the valve and other accessories, and converts it into mechanical energy to complete the punching holes action on the workpiece. The transmission power range is large, the function is strong, the reliability is good, the mechanical efficiency is high, the safety is high, the service life is longer than the ordinary mechanical punch, the noise is low, the mechanical wear is small, etc. In recent years, hydraulic punching machine uses oil has been widely used in anti-theft nets and door flowers, Guardrails and other industries, favored by the majority of users.

Hydraulic Punching Machines are mechatronics automation equipment, hydraulic punching machines are widely used in the chassis cabinets processing, air conditioners, refrigerators, solar plate, kitchen equipment, instruments and meters, electric control cabinets, building construction decorative materials, auto parts, silencing plate, lamps, and other sheet metal processing industries.

Hydraulic CNC Punching Machine Features:

Using in-line type die set which researched and developed by our company, matching with thick plate stamping dedicated mould, the processing sheet thickness can up to 16 mm;

Equipped with high precision hydraulic main transmission system, speed is faster, stroke is adjustable.

Adopts Siemens CNC special system and match up digital AC servo motor to make it faster and reliable, operation is easy, noneed manual programming and processing,

with the second positioning function, can achieve no dead zone processing

Equipped with concentrated lubricating device, reduce each kinematic pair friction, improve machines service life.

We are a professional factory in industrial field, our **PuHua hydraulic cnc punching machines** are all in line with international standards, welcome to order.

What information do you need to provide if you want to customize this hydraulic punching machine. We have many size of machines for you to choose, we can also customize the appropriate products for you according to your needs, please indicate the following details.

1. Please tell us your metal sheet material.
2. The workpiece dimension, including length, width and thickness.
3. The information of your workpiece hole shapes and hole diameter.

Based on this detail information, the detailed technical proposals will be sent to you for reference

After-sale service about MSL:1. Installation and commissioning issue: We will send 1-2 technicians to assist with machine installation and commissioning, customer pays for their tickets, hotel and diet.

Customer need to prepare various installation machinery and tools.

2. Warranty time:12 months from date of commissioning completion, but no more than 18 months from date of delivery.
3. Supply full english documents: including general installation drawings, pit design drawings, manual book, electric wiring diagram, electric manual book and maintenance book, etc.

If you need our help, we will provide you with services at any time.

As one of the leading companies in the manufacturing industry, we guarantee the products quality and delivery time. We have our own core technology and production line. We will design and produce new products. Within the allowable range, we will give you the most suitable price.

If you want to order our [PuHua CNC Punch Machine](#) , please feel free to contact us!

Company address: 222 Tieshan Road, Huangdao District, Qingdao City, Shandong Province

Email: sales@ccmachinery.cn

Call us: +86 152 6413 6591

Leave a message: <https://www.msl-machinery.com/contact-us.html>

More products information can be searched through the search box at the top. Choose us, you will get the best service!
