Matrix Meditec was started in 2004 with the single-minded focus to provide world-class implants and instruments to our users. Since then, the matrix has come a long way. With a business that spans over 30 countries, Matrix has now established a name for itself in the industry across the globe. We are driven by radical engineering and superior technology to help people with orthopedic imparities lead the most comfortable lives. Our product range spans from trauma, spine, joint to hip replacement and instruments. We believe that our inclusive range of products, an assertion on high quality, ingenious production, a wide network spread across 30 + countries and ever-growing relations with stakeholders in the healthcare industry is the main reason behind Matrix's success in the fraternity of orthopedic implants and instruments.
