We use the world-renowned open-source platform Open Journal System (OJS) to host open-access journal websites. Our ready-to-use OJS theme is easy to install and allows you to establish your open-access journal website quickly.

Our expert team will make your website live in two weeks. We offer 99.98% server uptime. We also provide many plugins for extending the functionality of websites hosted on OJS.

We provide major OJS upgrades for free. In addition, we offer extra value-added services like the DOI (Digital Object Identifier) facility, along with the basic journal setup and OJS Migration Services. All in all, one can say that OJSCLoud is a one-stop solution for open-access journal websites that provides end-to-end support.
