SAFE C19, a fully automatic temperature and face mask detection solution for a completely contactless with hand sanitizer. A solution so unique that it has integrated door access control if monitoring parameters are normal. An image is still captured, stored locally and uploaded in cloud server on its own, as reference for auditing. Meant to be used in indoor public spaces like Offices, Factories, Showrooms, Schools, Colleges, Residential societies, ATMs, Banks, Shops, Theaters, Supermarkets and so on...
