"Schoollog is a service targeted for schools to enable cloud based school management system and communication between the school and parents.

Schoollog was born from the passionate appreciation of the importance of school to parent communication. Due to busy schedule or lack of information to parents, the parent-school connect is lost in the grey. Schoollog increases communication between families and schools, thus making parents play an active role in their ward's education. With a smartphone in every hand, it creates an intuitive and cost-effective way of keeping parents informed. Schoollog also improves school office productivity by reducing paperwork and unnecessary phone calls.

Its one of the best School Management Software available in Indian Markets. "
