From 1987 onwards, Space Age Plastic Industries has been producing and exporting plastic components. Spaceage Plastic Industries has grown to offer its clients top-quality and precise services. The building covers 2510 square feet. We launched a manufacturing facility with 12,000 square feet located in Atgaon Shahapur. Plastic components can be customized and manufactured to customer specifications using design tooling, production, and flexibilities. The difficult task is taken care of by our expert designers. Due to its versatility in manufacturing, the Space Age can produce huge quantities of plastic components at a lower price. Space Age is produced under strict quality control processes to ensure that the product is of the most stringent standards. In just ten years the Space Age has created a complex and sophisticated infrastructure. The products we offer are top standard. In addition, our clients appreciate our transparency in business practices, timely delivery, top-quality testing, exceptional customer service, and ingenious ways of working. Director Mr. N. M. Verma director has earned us confidence in the market. Verma has made himself a successful administrator, as well as a business leader. Verma is determined to assist his team members to grow their businesses.
