Tian Yi Hong Tu (Tianjin) Technology Co. , Ltd. is located in the national important industrial base, north China Economic and Cultural Center city of China, Tianjin, the company is committed to **vacuum pump**, vacuum complete sets of equipment, research and development, design, manufacturing, sales and services, with experienced vacuum technicians and continuous absorption of vacuum technology, keep close cooperation with the vacuum specialty of the Mechanical College of Northeastern University, continuously develop and perfect product design and application, to meet the vacuum application of various industries to provide a good solution.

The company's products mainly have two major categories, one is the vacuum acquisition equipment namely the vacuum pump, has **2BV, 2BE, series liquid ring vacuum pump** and compressor, X series single-stage Rotary Vane vacuum pump; the other is the international well-known brand agent, has **KSB centrifugal pump Chemical Pump, Yarway Valve**, full line, Fisher self-supporting regulator. Among them, the vacuum application product is takes the vacuum acquisition equipment as the vacuum host (the vacuum source) , optional gas-liquid separator, vacuum buffer tank, heat exchanger, pressure transmitter, temperature transmitter, liquid level transmitter, solenoid valve, inlet pneumatic valve, cavitation protection device, working night flow meter, inlet air filter, etc. The control points can be monitored in real time. And can configure PLC, man-machine interface touch screen, such as pumps, valves according to the user process to open automatically, record the parameters and real-time running state, to achieve real process automation.

In line with the business philosophy of service, integrity and efficiency, the company strictly pursues the product quality as the firm cornerstone for the development of the enterprise. Many products have obtained qualified product inspection reports from professional testing institutions Tian Yi Hong Tu (Tianjin) Technology Co. , Ltd. ensures that every product goes through strict inspection before it leaves the factory, and sells well in the market with the advantages of stable performance, reliable quality, timely supply and good service.

Products are widely used in petrochemical, pharmaceutical, electronic, new materials, batteries, fire power, wind power, hospitals, printing, paper, transformers, packaging, automation, METALLURGY AND OTHER INDUSTRIES It provides a safe and reliable vacuum source for vacuum distillation, feeding, vacuum adsorption, vacuum introduction, vacuum drying, vacuum furnace, wood laminating, artificial wave making, space and simulation experiment. The Development and growth of Tianyi Hongtu (Tianjin) Technology Co. , Ltd. can not do without the support, patronage and love of new and old customers.

Tian Yi Hong Tu (Tianjin) Technology Co. , Ltd. is willing to achieve a win-win situation for both customers and companies with excellent products and economic prices And the user becomes the trust sincere friend and the partner.
