Suhagra contains Sildenafil which belongs to the group of drugs called Phosphodiesterase type 5(PDE 5) impediments. It's used to luxury erectile dysfunction in men. Erectile dysfunction (also known as incompetence) is a sexual condition where a man cannot sustain a hard erected penis which is needed for normal sexual exertion. It happens due to dropped blood inflow to the penis which is caused due to narrowing of the blood vessels supplying the penis. Sildenafil improves penile construction (make penis establishment) during sexual intercourse.
