TCBS Agar is used for selective isolation of *Vibrio cholerae* & other enteropathogenic *Vibrios* causing food poisoning. This highly selective medium meets the nutritional requirements of *Vibrio* species and allows competing with intestinal flora. *Vibrio* species is able to grow in media containing increased salt concentrations. *Vibrio* species are natural inhabitants of water. Proteose peptone and Yeast extract are the sole sources of carbon, nitrogen, vitamin B - complex, minerals and amino acids in the medium.
