Tricort injection is a steroid injection which may be used in adults to reduce inflammation and swelling from injuries, surgeries and other conditions. It is given by a health care provider in the muscle of the buttock or thigh, or into the space around the spinal cord on one or both sides of the back. It is not known how Tricort Injection works to relieve pain, but it does work as an anti-inflammatory medication for post-surgical patients. There are many clinics where tricort injection in mumbai available.
