Outdoor spaces are evolving the way they appeal with a modernized touch to it. It is substantial for a flooring system to withstand weather changes as well as the functionality of an outdoor space, for a longer life-span.

Unitile All-Weather Pedestal is geared towards giving the specifier not just a product that meets and exceeds the required specification but also technical and on-site support that ensures the on-time installation. This solution offers a practical passage for pipes and the open gaps between the outdoor tiles allow the water to drain-off into the cavity created under the panels.

The Unitile All-weather pedestal has been designed keeping in mind both aspects. The versatility of the system allows its application to a wide range of spaces such as restaurants, roof-top terrace, balconies, gardens, swimming pools, wall decks and many more.
